The Task Force for Global Health, based in Atlanta and founded 40 years ago to advance health equity, works with partners in more than 150 countries to eliminate diseases, ensure access to vaccines and essential medicines, and strengthen health systems to protect populations so that people can achieve their full potential.

**Eliminate Diseases**
- Polio
  - Polio eradication surge capacity
  - Polio antivirals initiative
- Viral Hepatitis
- Neglected Tropical Diseases (NTDs):
  - Intestinal Worms
  - Leprosy
  - Lymphatic Filariasis
  - River Blindness
  - Schistosomiasis
  - Trachoma
- Facilitate operational research on NTDs

**Ensure Access to Vaccines**
- Support low- and middle-income countries with COVID-19 vaccine deployment and evaluation
- Build immunization infrastructure and capacity for future respiratory pandemics and epidemics
- Strengthen low- and middle-income countries’ disease surveillance systems
- Inform vaccine safety protocols
- Equip parents to make informed decisions about immunizations

**Strengthen Health Systems**
- Train and support epidemiologists worldwide for disease surveillance and outbreak response
- Equip health agencies to effectively use data to improve public health
- Lead cross-sector alliance improving access to quality donated medical products
- Lead partnership for collaboration on large-scale health campaigns
- Provide consulting, training and research on ethics and compassion in public health practices
